Thai Herbal Steam Sauna

30 - 45min / 700 THB

The proven benefits

Toxin removal

Our highly aromatic medicinal herbs, many of which are home grown and prepared here at Chivitr, are quickly absorbed into the bloodstream and circulate directly to every tissue of your body, delivering their therapeutic powers to each and every cell. At the same time, the hot steam opens your pores and allows the herbal vapours to enter the skin to draw toxins out with your sweat.

Respiratory ailments

Our herbal steam bath is especially good for respiratory problems, such as bronchitis, asthma, sinusitis and allergies, as the steam removes allergens and mucus from lungs. Steam also has a soothing quality for the breathing passages since it raises the moisture level in your lungs, throat and nose. People who suffer from respiratory ailments find they feel much better after indulging our Thai herbal steam experience.

Immunity

During your Thai herbal steam experience your body temperature becomes higher and the functioning of the immune system is stimulated, while the growth of bacteria and viruses is forced to slow down. The production of white blood cells; the primary agents of the immune system, is increased, as is the rate of their release into the bloodstream. The generation of antibodies speeds up, as does the production of interferon, and antiviral protein that also has powerful cancer fighting properties.

Electro Lymphatic Therapy

60 min / 2,500THB
90 min / 3,500 THB
5 x 60 min sessions / 11,500 THB
10 x 60 min sessions / 22,500 THB
5 x 90 min sessions / 16,000 THB
10 x 90 min sessions / 31,500 THB

The Electro Lymphatic Therapy (ELT) is a therapeutic treatment using science technology device design to improve and enhance our body's lymphatic system.

The instrument produces information through the transmission of noble gas ionisation. The technology takes advantage of a complex circuit within the machine which transmits energy by electronically ionising noble gasses (Xenon, Argon, and Krypton) in a lead-free glass tube that is applied to the surface of the skin affecting the underlying interstitium which has become clogged or sluggish. A plasma energy field is then created to open the lymph system, improve Lymphatic flow, decongesting the clog up lymph system and accelerating detoxification of tissues.

The Quantum Physics behind this device not only charges red blood cells, improving their mobility. But also breaks up wastes being stored in the tissues, which clears pathways in the lymph system to make the immune system more functional.

Useful applications of ELT:

- Autoimmune Disorders
- Detoxification
- Decreases viral, bacteria, and fungal loads
- Improves immune function
- Increases healing process
- Improves absorption
- Calms the Central Nervous System
- Increases focus and cognition
- Problems associated with fluid retention
- Relieves congestion
- Fibromyalgia
- Reducing inflammation
- Chronic colitis
- Cellulite reduction
- Helps relieve asthma
- Relief from headaches and sinus congestion

Far Infrared Sauna

30 min / 700 THB

The proven benefits

Detoxification

Sweating is one of the body's most natural ways to eliminate toxins, making it a crucial part of detoxification. When compared to more traditional 'Swedish' saunas, our far-infrared saunas facilitate the elimination of up to seven times more toxins.

Relaxation

Our far-infrared sauna therapy promotes relaxation by helping to balance your body's level of Cortisol, your body's primary stress hormone. The heat generated by the sauna will also help to relax your muscles and relieve tension throughout your body allowing you to relax and de-stress.

Pain Relief

If you suffer from muscle aches or joint pain, our far-infrared sauna can help to relieve this form of inflammation by increasing circulation and relaxing your muscles.

Weight Loss

The heat generated by our far-infrared saunas will cause your core temperature to increase, which can also lead to an increase in heart rate that you experience when exercising. When your body has to work harder to lower your core temperature or keep up with an increased heart rate it will burn more calories, resulting in weight loss. For example a 30 minute far-infrared sauna session could burn up to 600 calories, depending on the individual.

Improved Circulation

As the heat generated from a far-infrared sauna increases your core body temperature, your circulation will increase along with it. The middle-infrared level can stimulate blood-flow, improve muscle recovery and decrease pain and inflammation after intense exercise.

Skin Purification

The far-infrared sauna technology we use here at Chivitr can help purify your skin by eliminating toxins from your pores and increasing circulation resulting in clearer, softer, and healthier-looking skin.
